## I find where work gets lost, in inboxes, meetings, and handoffs, and build the systems that make it manageable.

Hands-on with generative AI since 2023, I roll it out to teams, connect the tools they already use, and condense a lot of information into briefs people can act on.

### EXPERTISE

- AI enablement & adoption
- Workflow automation
- Systems integration
- Data analytics & BI reporting
- Web development & UX/UI
- Digital marketing

### PLATFORMS & TOOLS

| | |
|---|---|
| AI & build | Claude (Team, Code, Cowork) · ChatGPT, Gemini · Google Apps Script · HTML/CSS, JavaScript · Next.js · GitHub, Netlify |
| Operations | Monday.com · Google Workspace · Notion · Jotform · Zapier · Pipedrive · Salesforce (basic) |
| Marketing | Brevo · HubSpot · Mailchimp · WordPress, Unbounce · Google Ads, Adalysis · Meta Ads · PR Newswire |
| Analytics | Google Analytics 4 · Looker Studio · Supermetrics · Narrative BI |
| Event technology | vFairs · Bravura · Whova · YourEvent · Bunny Stream |
| Channels & tactics | Email automation · Lead nurture · A/B testing · SEO content · Win-back campaigns & event promotion |
| Industries | Events & associations · Healthcare · Legal · Finance · Higher ed · Retail · Political |

### EXPERIENCE

#### Integrated Systems & Marketing Operations

Jan 2026 – Current

ARB Meetings & Events

AI ADOPTION & AUTOMATION

- Led company-wide adoption of Claude Team, connecting core systems, client files, and shared docs into one knowledge base for a 10-person team.
- Noticed the team was getting too many emails and sitting in calls that weren't theirs; analyzed shared-inbox volume (one person handled about 80%), made the case, and replaced both with a weekly client digest.
- Built Claude automations that turn every Zoom summary into a living project record in Monday.com, with task updates drafted for review, saving an estimated 1.5–2.5 hours per person each week.
- When a colleague left, set up twice-daily AI triage of her 40+ daily emails so nothing got lost in the handoff, saving an estimated 1.5–2.5 hours a day.

TOOLS & SYSTEMS

- Built a speaker graphic generator that fits any name and session to the brand and updates from the agenda. About 100 speakers made their own, saving an estimated 20–30 design hours, and they were a hit on LinkedIn.
- Built a logo resizer that took the back-and-forth, and the mental load, out of getting 150 sponsors' logos into every required size.
- Owned the post-event survey and reporting program, condensing a lot of information into executive summaries for steering committees, funders, and staff, including a 39-page outcomes report from 9 data sources.
- Engineered a registration code system for 300–400 invitees and set up conference apps; FIMCON's hit 75.1% adoption, 1.5x the benchmark.

MARKETING & COMMUNICATIONS

- Researched personas and built the full-funnel strategy and website for a chronic disease convention, plus FIMCON 2026 email and LinkedIn content.
- Ran 30 Brevo campaigns at a 98.1% delivery rate and 39.8% click-to-open rate, over 2x the industry average; one press release earned 559 media pickups, including AP News.
- Produced social media toolkits for attendees, speakers, and sponsors, and directed photography for 3 of 4 on-site conferences.

## Marketing Administrator & IT Administrator

Feb 2024 – Sep 2025

Comeaux Furniture, Appliance & Mattress

- Managed Google Ads ($2K–$15K/mo): 65% YoY conversion lift and 62% lower cost per conversion via PMax, restructuring, and AI-informed copy.
- Built dashboards and automated reporting in Narrative BI and Google Sheets, cutting quarterly inventory QA from 24 hours to under one.
- Ran IT and SEO, connected Myriad to the website inventory system, and negotiated sponsorships backed by market analysis.

## Digital Manager & Analytics Coordinator

Oct 2022 – Jul 2023

Morgan & Co. · SEO, analytics & reporting lead

- As the agency's first and only SEO specialist, scoped requirements and deliverables for every SEO project and led them through delivery.
- Defined KPIs and the measurement framework, adapting reporting as projects ran based on client feedback and pushback on contract terms.
- Rebuilt client reporting in Looker Studio, saving 4–5 hours per report, and challenged the team to raise its baseline SEO and analytics knowledge.
- Co-managed paid media for healthcare (LCMC), gaming, legal, and hospitality clients across Google Ads and Meta, running QA and KPI monitoring.

## Sales & Marketing Coordinator

Dec 2021 – Oct 2022

Search Influence

- Set up automated lead nurture workflows in HubSpot and aligned email, paid media, and SEO across the funnel.
- Continued owning the company blog, and built proposals and sales materials from performance data in Looker Studio.

## Director of Marketing & Brand Creative

May 2021 – Oct 2021

Cura OS

- Created marketing strategies structured around S.M.A.R.T. goals, with measurable targets for each channel.
- Directed a full brand identity and website rebuild, growing the site from one landing page to twelve SEO-optimized pages.
- Built buyer personas, sales funnels, and internal documentation, and led company-wide Pipedrive CRM adoption.

## Account Manager & Coordinator

Nov 2019 – Jun 2021

Search Influence

- Ran full-funnel strategy for regulated industries (finance, legal, medical, higher ed), planning how content nurtures people toward the goal.
- Drove a 49% increase in inquiries for Palo Alto University and a 77% ROI lift for a plastic surgery client.
- Owned 20 training modules and knowledge-base articles, keeping them current as industry and company standards changed.
- Trained in Lean methodology; built Zapier workflows for lead handling and CRM integration.

## Account Coordinator

Sep 2018 – Nov 2019

Search Influence

- Owned the company blog as Search Influence's own account coordinator and let the data decide what got written: built the editorial calendar from analytics, trends, and sales priorities, and managed up to 6 posts a month.
- Defined editorial guidelines, gave hands-on draft feedback, and measured content-to-pipeline impact against S.M.A.R.T. goals.
- Led stakeholder interviews and requirements gathering across New Orleans City Park, co-wrote its website RFP, and evaluated vendor proposals.
- Coordinated the Vote Parks & Rec millage campaign, which passed: paid and Facebook ads, Unbounce landing pages, a Zapier yard-sign sign-up workflow, and reporting. Found and wrote its two winning award submissions.

### Education

BS, Marketing

University of New Orleans, 2018

Outstanding Marketing Senior 2018
