AI operations and marketing systems professional, hands-on with generative AI since 2023. I lead AI adoption, connect business systems, and build tools and automations that turn scattered information into clear, measurable results.

EXPERTISE

- AI enablement & adoption
- Workflow automation
- Systems integration
- Data & dashboards
- Web development & UX/UI
- Digital marketing

PLATFORMS & TOOLS

AI & build	Claude (Team, Code, Cowork) · ChatGPT, Gemini · Google Apps Script · HTML/CSS, JavaScript · Next.js · GitHub, Netlify
Operations	Monday.com · Google Workspace · Notion · Jotform · Zapier · Pipedrive · Salesforce (basic)
Marketing	Brevo · HubSpot · Mailchimp · WordPress, Unbounce · Google Ads, Adalysis · Meta Ads · PR Newswire
Analytics	Google Analytics 4 · Looker Studio · Supermetrics · Narrative BI
Event tech	vFairs · Bravura · Whova · YourEvent · Bunny Stream
Campaigns	Email drips · Lead nurture · A/B testing · SEO content · Re-engagement & event promotion
Industries	Events & associations · Healthcare · Legal · Finance · Higher ed · Retail · Political

EXPERIENCE

Integrated Systems & Marketing Operations

Jan 2026 – Current

ARB Meetings & Events

AI ADOPTION & AUTOMATION

- Led company-wide adoption of Claude Team, unifying core systems, client files, and shared docs into one knowledge base for a 10-person team.
- Audited the shared client inboxes, found one person handled about 80% of messages, and led the change to take everyone else off them and out of meetings that didn't need them, replacing both with a weekly client digest.
- Administered Monday.com, integrating Brevo, Jotform, and Google Workspace, and built Claude automations that file Zoom summaries into each client's workspace and draft task updates, saving an estimated 1.5–2.5 hours per person weekly.
- Piloted a daily brief across Gmail, Google Chat, Monday.com, comms calendars, and an AI time tracker, with one-click task updates and time logging.
- After a colleague left, set up twice-daily AI triage of her 40+ daily emails, routing each to the right teammate, saving an estimated 1.5–2.5 hours a day.

TOOLS & SYSTEMS

- Built a speaker graphic generator that fits any name and session to the brand template and updates from the agenda; about 100 speakers made their own and shared them widely on LinkedIn, saving an estimated 20–30 design hours.
- Built a logo resizer that outputs every required size for 150 sponsors without distortion (an estimated 10–15 hours saved per conference), plus an OCR receipt scanner and a pay-per-view video archive.
- Engineered a registration code system for 300–400 invitees: unique codes, personalized emails, redemption tracking, and reminders.
- Owned post-conference evaluations and reporting as a client product, turning results into briefs for steering committees, funders, and staff.
- Authored a 39-page outcomes report drawing on 9 data sources, and designed interactive dashboards in Claude and Looker Studio.
- Configured conference apps on vFairs, Bravura, and Whova; FIMCON's app reached 75.1% adoption, about 1.5x the industry benchmark.

MARKETING & COMMUNICATIONS

- Researched personas and built the full-funnel strategy and website for a chronic disease convention, plus FIMCON 2026 email and LinkedIn content.
- Ran 30 Brevo campaigns at a 98.1% delivery rate and 39.8% click-to-open rate, over 2x the industry average; earned 559 media pickups, including AP News, from one press release.
- Produced social media toolkits for attendees, speakers, and sponsors, and directed photography for 3 of 4 on-site conferences.

Marketing Administrator & IT Administrator

Feb 2024 – Sep 2025

Comeaux Furniture, Appliance & Mattress

- Managed Google Ads ($2K–$15K/mo): 65% YoY conversion increase and 62% lower cost per conversion via PMax, pruning, and AI-informed copy.
- Built dashboards and automated reporting in Narrative BI and Google Sheets, cutting quarterly inventory QA from 24 hours to under one.
- Directed SEO, site optimization, and digital assets, and connected Myriad to the website inventory system.
- Maintained IT infrastructure, conducted market analysis, and negotiated sponsorships aligned with brand strategy.

Digital Manager & Analytics Coordinator

Oct 2022 – Jul 2023

Morgan & Co. · SEO, analytics & reporting lead

- As the agency's first and only SEO specialist, scoped and led every SEO project, defining what the work included and seeing it through.
- Adapted reporting and analytics as projects ran, using client feedback and pushback on contract terms to decide what to measure.
- Rebuilt client reporting in Looker Studio, saving 4–5 hours per report, and coached the team to raise its baseline SEO and analytics knowledge.
- Co-managed paid media for healthcare (LCMC), gaming, legal, and hospitality clients across Google Ads and Meta.
- Ran QA, KPI monitoring, and audience performance analysis, and produced branded video content with AI tools.

Sales & Marketing Coordinator

Dec 2021 – Oct 2022

Search Influence

- Set up automated lead nurture workflows in HubSpot and aligned email, paid media, and SEO across the funnel.
- Continued owning the company blog, and built proposals and sales materials from performance data in Looker Studio.

Director of Marketing & Brand Creative

May 2021 – Oct 2021

Cura OS

- Created marketing strategies structured around S.M.A.R.T. goals, with measurable targets for each channel.
- Directed a full brand identity and website rebuild, growing the site from one landing page to twelve SEO-optimized pages.
- Built buyer personas, sales funnels, and internal documentation, and led company-wide Pipedrive CRM adoption.
- Designed a persona-segmented Mailchimp drip campaign and created assets across email, social, and digital.

Account Manager & Coordinator

Nov 2019 – Jun 2021

Search Influence

- Ran multi-channel, funnel-stage strategy for regulated industries (finance, legal, medical, higher ed), coordinating messaging, targeting, and content.
- Drove a 49% increase in inquiries for Palo Alto University and a 77% ROI lift for a plastic surgery client.
- Owned 20 internal and external training topics, writing and updating the documentation as industry and company standards changed.
- Trained in Lean methodology; implemented Zapier workflows for lead handling, CRM integration, and campaign consistency.

Account Coordinator

Sep 2018 – Nov 2019

Search Influence

- Owned the company blog as Search Influence's own account coordinator: chose topics from analytics, trends, and sales priorities, assigned up to 6 posts a month company-wide, and ran editing, QA, and publishing.
- Set editorial criteria, gave hands-on draft feedback, and tracked which topics drove sales meetings against S.M.A.R.T. goals.
- Interviewed every New Orleans City Park department, turned the feedback into its website RFP, and rated the submissions.
- Coordinated the Vote Parks & Rec millage campaign, which passed: paid and Facebook ads, Unbounce landing pages, a Zapier yard-sign sign-up workflow, and reporting. Found and wrote its two winning award submissions.

EDUCATION & AWARDS
